

# NPK 14-18-18+6S

Ternary fertilizer, complex granule, with sulfur

---

## Use

NPK 14-18-18+6S is a complex granule fertilizer, highly concentrated and with excellent nutritional balance, containing the three primary macronutrients and sulfur, with 100% of the sulfur in sulfate form ( $\text{SO}_4$ ). This formulation increases agricultural productivity, prevents soil degradation and improves fertility of deficient soils. NPK 14-18-18+6S can be used directly for soil fertilization or as raw material in the industry for production of mineral fertilizer blends.

## Packaging

- In bulk
- Big bags available upon request.

---

## Properties

### Physical

Physical state: granule  
Appearance: beige

### Chemical

Nitrogen: 14% (in ammoniacal form)  
Phosphorus: 18% ( $\text{P}_2\text{O}_5$  soluble in CNA + water)  
Potassium: 18% ( $\text{K}_2\text{O}$  soluble in water)  
Sulfur: 6% (in  $\text{SO}_4$  sulfate form)
