

Dicalcium phosphate (PHOSFEED® 18)

Introduction

PHOSFEED® 18 is a feed grade dicalcium phosphate produced by a chemical reaction between a feed grade phosphoric acid and high-quality calcium carbonate under strictly controlled conditions.

Benefits

- Higher solubility and bio-availability provides livestock with a greater nutritional value
- Pure mineral ingredients in line with EU standards

Packaging

- Bags of 25 kg
- Big bags available upon request.

Specifications

Phosphorus: 18,5%
Calcium: 24,5%

Solubility of phosphorus in citric acid 2%: 98%

Humidity: 2%
