

Natural reactive phosphate (Phosactiv®)

Use

Phosactiv® has ores originated from organic marine sediments, which serve as nutrients source, including phosphorus and calcium. It is one of the most natural reactive phosphates in the world and can be used in semi-perennial and perennial crops, phosphating and opening of lands and in annual crops, in soils with built fertility.

Embalagem

- In bulk
- Big bags available upon request.

Properties

Total P_2O_5 : 27% (min.)

Total calcium: 32%

Solubility in citric acid: 30% (equivalent to 8.1 points of P)

Solubility in formic acid: 55% (equivalent to 14.85 points of P)
