

Water-soluble monoammonium phosphate(NUTRIDROP®)

12-61-00

Introduction

NUTRIDROP® is a fertilizer highly soluble in water. It has a high concentration of phosphorus and is rich in hydrogen.

Use

NUTRIDROP® is recommended to added value crops, such as flowers, vegetables and fruits. It can be used via hydroponics, fertigation and foliar and as an ingredient to other formulations. It provides optimal rates of nutrients throughout the growing cycle of plants.

Packaging

- Bags of 25 kg
- Big bags of 1.250 kg
- Other packaging available upon request.

Specifications

Nitrogen: 12% (min.)
Phosphorus (P_2O_5): 61% (min.)
