

# Triple superphosphate with sulfur

TSP+S 00-40-00+12S | Mixed mineral fertilizer

---

## Use

00-40-00+12S is a fertilizer with a high concentration of phosphorus, calcium and sulfur and provides a complete and balanced supply of these nutrients. This differentiated concentration, in comparison to other phosphate fertilizers, offers high operational gains since it reduces labor costs, application time and equipment use in the fertilization of crop areas. The product can be used in any kind of soil and crop, due to the adequate availability of nutrients in its composition, apart from serving as a base for most fertilizer formulas used in Brazil.
